SWITCHING TO A PLANT-BASED DIET CAN HELP FIGHT CLIMATE CHANGE, UN EXPERTS HAVE SAID. A MAJOR REPORT ON LAND USE AND CLIMATE CHANGE SAYS THE WEST'S HIGH CONSUMPTION OF MEAT AND DAIRY PRODUCE IS FUELLING GLOBAL WARMING. BUT SCIENTISTS AND OFFICIALS STOPPED SHORT OF EXPLICITLY CALLING ON EVERYONE TO BECOME VEGAN OR VEGETARIAN. THE REPORT CALLS FOR KICKING ACTION TO HALT SOIL DAMAGE AND DESERTIFICATION - BOTH OF WHICH CONTRIBUTE TO CLIMATE CHANGE.

THEY SAID THAT MORE PEOPLE COULD BE FED USING LESS LAND IF INDIVIDUALS CUT DOWN ON EATING MEAT.

Switching to a plant-based diet can help fight climate change, UN experts have said. A major report on land use and climate change says the West's high consumption of meat and dairy produce is fuelling global warming. But scientists and officials stopped short of explicitly calling on everyone to become vegan or vegetarian. The report calls for kicking action to halt soil damage and desertification - both of which contribute to climate change.

They said that more people could be fed using less land if individuals cut down on eating meat.
